Art Unit: 1653

Applicant's responses filed 11/23/2005, 2/10/2006 and 2/14/2006 are acknowledged.

Claims 2-3, 6-11, 13-22, 24-51 are canceled. Claims 1, 4-5, 12, 23, 52-53 are pending.

In view of applicant's amendment to claims 1, 4, 12 and 23 wherein generic sequences set forth as SEQ ID NO:25 and 30 are introduced further restriction deemed necessary as following:

**Claims 1, 4, 12 and 23 are generic** to the following disclosed patentably distinct species: **SEQ ID NO:25** –Xaa Xaa Xaa Xaa Xaa , wherein residues 1, 4, 6 and phenylalanine, or tyrosine. Residues 2 and 3 are variable amino acids and residues 5 is serine or thereonine, and

**SEQ ID NO:30**-Xaa Xaa Xaa Xaa Xaa Xaa, wherein residues 2 and 3 are variable, residues 1, 4 and 6 are phenylalanine or tyrosine and residue 5 is a negatively charged amino acid.

The species are independent or distinct because they each have unrelated chemical structure and function. Applicant is required under 35 U.S.C. 121 to **elect a single disclosed species** from SEQ ID NO:25 and SEQ ID NO:30, wherein every amino acid constituent is identified, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

A telephone call was made to Ms. Karla M. Weyand on 5/2/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 1653

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Applicant is also reminded that the traversal arguments directed to claim 5 and newly added claims 52-53 will be addressed in the same office action wherein a response is prepared to claims 1, 4, 12 and 23 claims directed to a single species.***
